

SILICONE TUBING FOR MEDICAL AND PHARMACEUTICAL APPLICATIONS

The world's leading pharmaceutical and medical device companies rely on HelixMark to provide an extensive selection of high-quality silicone tubing and fluid handling products.

All HelixMark products are clean room manufactured in compliance with medtech and pharmaceutical industry requirements.

The following criteria apply to all articles of this program:

- Materials approved in accordance with USP Class VI, ISO 10993-1, FDA 21CFR 177-2600 and EP 3.1.9 or EP 3.1.9 without appearance of solution
- Exclusive utilization of platinum-cured silicone
- Production and packaging in ISO Class 8 clean rooms
- Certified manufacturing in compliance with ISO 13485 quality standards
- Sterilizable in autoclaves, with ethylene oxide and by gamma irradiation
- Material certification in every package
- Lot traceability
- Double bagged and box packaging
- Off-the-shelf availability guarantees short delivery times
- Customer-specific solutions available outside the HelixMark standard product portfolio

HELIXMARK® STANDARD TUBING

HelixMark standard silicone tubing meets the needs of a broad range of applications and is universally applicable for the transfer of fluids under standard requirements. The tubing is offered in four types of silicone elastomer: Dow Corning, Wacker, NuSil, and Momentive. Individually packed in pre-cut lengths of 50 feet.

HELIXMARK® PERISTALTIC PUMP TUBING

HelixMark peristaltic pump tubing is designed and manufactured for use with peristaltic pumps and other applications with higher effective forces. A special production process designed to meet these requirements ensures that the products provide greater stability and capacity to withstand high stress. Offered in a range of sizes suitable for use with all commonly used pump types. The tubing is individually packaged in pre-cut lengths of 25 feet.

HELIXMARK® BRAIDED REINFORCED TUBING

HelixMark braided reinforced tubing is designed and manufactured for increased pressure and high temperature applications. Pressure-proof polyester braiding, firmly embedded between two layers of silicone, lends this tubing its particular durability and resistance to pressure. The tubing is individually packaged in pre-cut lengths of 25 feet.

HELIXMARK® CLOSE TOLERANCE TUBING

HelixMark close tolerance silicone tubing maintains particularly tight tolerances with regard to inner diameter and wall thickness and is subjected to stringent quality assurance measures in production. This ensures increased dosing precision in demanding applications. The tubing is individually packaged in pre-cut lengths of 50 feet.

Values listed are typical.
Typical hardness: 50 Shore A.
50 foot coils (~15 m).
Packaged double bagged in boxes.* Material certification and lot traceability documents included in every box.

HELIXMARK® TWO-HOLE STOPPERS

Values listed are typical.
Typical hardness: 50 Shore A.
Please contact customer service for tolerances and custom size requests.
Packaged 12 per zip bag in crush-resistant boxes.*
Material Certification and Lot Traceability included.
Not for implantation.
Nonsterile.

IN ACCORDANCE WITH
ISO: ISO 10993-1
FDA: FDA 21CFR 177-2600
USP: USP-CLASS VI
EP: EP 3.1.9
(EP): EP 3.1.9 without appearance of solution

* Individual measured values may differ from mean values. These values are not to be considered as product specifications. Non-implantable, non-sterile.

HELIXMARK® CUSTOM SERVICES

In addition to the products for the general needs of the medtech and pharmaceutical industry shown in our catalog, we also offer a wide range of options for customer-specific silicone tubing solutions. This allows the configuration of made-to-measure solutions to meet the customer's precise requirements.

**MULTI-LUMEN
TUBING**

CUSTOM COLORS

**UV-LIGHT SHIELDING
TUBING**

**RADIOPAQUE
TUBING**

**PACKAGING ON
SPOOLS**

PAD PRINTING

**DOUBLE BRAIDED
TUBING**

LASER PRINTING

TUBING SYSTEMS

ADDITIONAL SERVICES

- Precision cut-to-length
- Tip trimming
- Hole Punching
- Skiving
- Overmolding

Freudenberg Medical manufactures products exclusively for the medical and pharmaceutical industry. This focus enables us to understand and rapidly and efficiently fulfill our customers' precise requirements. Our capabilities as a supplier and partner in the development of products and solutions are distinguished by exceptional flexibility and innovation.

We are your global partner for the design, development and production of innovative medical technology and combination products. Our portfolio is comprised of complex medical components and catheter solutions for minimally invasive devices. We are a leading manufacturer not only in the field of precision molded components and tubing in silicone and thermoplastics, but also in coating technologies and the production of metal hypotubes.

Freudenberg Medical is a part of the Freudenberg Group, a technology group with a tradition reaching back over 165 years and a provider of innovative products for more than 30 market segments around the globe.

In our daily work, both our corporation and individual employees are committed to upholding the values for which we all stand:

- Value for customers
- Innovation
- Leadership
- People
- Responsibility and
- Long term orientation

As a development partner, we ensure that every innovation project our customers entrust to us is realized and led to commercial success by our unique combination of technical expertise, a global R & D network, financial stability and enormous flexibility.

SILICONE CHEMICAL COMPATIBILITIES

- Little or no effect (Volume swell <10%)
- Possible loss of physical properties (Volume swell 10–20%)
- Noticeable change (Volume swell 20–40%)
- Not suitable for service

Chemical Medium

- Acetaldehyde
- Acetamide
- Acetic Acid, 25% to 60%
- Acetic Anhydride
- Acetone
- Acetylene
- Acrylonitrile
- Alums
- Aluminum Chloride
- Aluminum Salts
- Aluminum Sulfate
- Ammonia Gas, Cold
- Ammonia Gas, Hot
- Ammonium Hydroxide, Concentrated
- Ammonium Nitrate
- Ammonium Phosphate
- Ammonium Salts
- Ammonium Sulfate
- Amyl Acetate
- Amyl Alcohol
- Amyl Borate
- Amyl Chloride
- Amyl Chloronaphthalene
- Amyl Naphthalene
- Aniline
- Aniline Hydrochloride
- Asphalt
- Barium Chloride
- Barium Hydroxide
- Barium Salts
- Beer
- Beet Sugar Liquors
- Benzaldehyde
- Benzene
- Benzoic Acid
- Bleach Liquor
- Borax
- Boric Acid
- Bromine
- Bromobenzene
- Butane
- Butyl Acetate
- Butyl Alcohol

- Butyraldehyde
- Calcium Bisulfide
- Calcium Chloride
- Calcium Hydroxide
- Calcium Hypochlorite
- Calcium Nitrate
- Calcium Salts
- Cane Sugar Liquors
- Carbitol
- Carbolic Acid
- Carbon Dioxide
- Carbon Monoxide
- Carbon Tetrachloride
- Carbonic Acid
- Castor Oil
- Caustic Soda
- Chlorinated Solvents
- Chlorinated Solvents, Dry
- Chlorinated Solvents, Wet
- Chlorobenzene
- Chlorobromomethane
- Chloroform
- Chloronaphthalene
- Chlorosulfonic Acid
- Chlorotoluene
- Chrome Plating Solution
- Chromic Acid
- Citric Acid
- Coconut Oil
- Cod Liver Oil
- Copper Salts
- Corn Oil
- Creosote, Coal Tar
- Creosote, Wood
- Cresol
- Cyclohexane
- Detergent Solutions
- Dextrose
- Diacetone Alcohol
- Dichlorobenzene
- Diethyl Ether
- Diethylamine
- Diethylene Glycol
- Dimethyl Formamide
- Dioctyl Phthalate
- Dioxane
- Diphenyl
- Ethers
- Ethanolamine
- Ethers
- Ethyl Acetate
- Ethyl Acetoacetate
- Ethyl Alcohol
- Ethyl Cellulose
- Ethyl Chloride
- Ethylene
- Ethylene Chlorohydrin

- Ethylene Diamine
- Ethylene Dichloride
- Ethylene Glycol
- Ethylene Oxide
- Ethylene Trichloride
- Fatty Acids
- Ferric Chloride
- Ferric Sulfate
- Fluorobenzene
- Formaldehyde
- Formic Acid
- Fuel Oil
- Fumaric Acid
- Gasoline
- Gelatin
- Glucose
- Glycerin
- Glycols
- Green Sulfate Liquor
- Halowax Oil
- Hexaldehyde
- Hexane
- Hydrazine
- Hydrobromic Acid
- Hydrochloric Acid, 3 Molar to 158°F
- Hydrochloric Acid, Hot 37%
- Hydrocyanic Acid
- Hydrofluoric Acid, Concentrated Hot
- Hydrofluorosilicic Acid
- Hydrogen Gas
- Hydrogen Peroxide
- Hydrogen Sulfide, Dry Cold
- Hydrogen Sulfide, Wet Cold
- Isobutyl Alcohol
- Isooctane
- Isopropanol
- Isopropyl Acetate
- Kerosene
- Lactic Acid, Cold
- Lard
- Lead Acetate
- Lead Nitrate
- Linseed Oil
- Lithium Hydroxide
- Lubricating Oils, Petroleum
- Lye
- Magnesium Chloride
- Magnesium Salts
- Magnesium Sulfate
- Manganese Sulfate
- Mercury
- Mesityl Oxide
- Methane
- Methanol
- Methyl Bromide

- Methyl Chloride
- Methylene Di-P-Phenylene Isocyanate
- Methyl Ethyl Ketone
- Methyl Isobutyl Ketone
- Methyl Methacrylate
- Methylene Chloride
- Milk
- Mineral Oils
- Monochlorobenzene
- Naphtha
- Naphthalene
- Natural Gas
- Nickel Chloride
- Nickel Salts
- Nitric Acid, 50–100%
- Nitrobenzene
- Nitroethane
- Nitrogen
- Nitrogen Oxides
- Animal Oil
- Lubricating Oils, Petroleum
- Mineral Oils
- Vegetable Oils
- Oleic Acid
- Oxalic Acid
- Oxygen, Cold
- Ozone
- Paraffins
- Perchloric Acid
- Perchloroethylene
- Petrol
- Phenol
- Phosphoric Acid
- Phthalic Acid
- Picric Acid
- Pinene
- Potassium Carbonate
- Potassium Chlorate
- Potassium Cyanide
- Potassium Dichromate
- Potassium Hydroxide
- Potassium Iodide
- Potassium Nitrate
- Potassium Salts
- Producer Gas
- Propane
- Pyridine
- Pyrrole
- Sea Water
- Sewage
- Silicone Oils
- Silver Nitrate
- Soap Solutions
- Soda Ash
- Sodium Bicarbonate
- Sodium Bisulfate

- Sodium Bisulfide
- Sodium Borate
- Sodium Chloride
- Sodium Cyanide
- Sodium Hydroxide
- Sodium Hypochlorite
- Sodium Nitrate
- Sodium Perborate
- Sodium Peroxide
- Sodium Phosphate, Dibasic
- Sodium Sulfate
- Sodium Sulfide
- Sodium Sulfite
- Sodium Thiosulfate
- Soybean Oil
- Stannic Chloride
- Stannous Chloride
- Stearic Acid
- Stoddard Solvent
- Styrene
- Sulfur Chloride
- Sulfur Dioxide
- Sulfur Hexafluoride
- Sulfur Dioxide
- Sulfur Trioxide
- Sulfuric Acid, Concentrated Room Temp
- Sulfuric Acid, Concentrated to 158°F
- Sulfurous Acid
- Tannic Acid
- Tar, Bituminous
- Tartaric Acid
- Tributyl Mercaptan
- Tin Chloride
- Toluene
- Trichloroethane
- Trichloroethylene
- Tricresyl Phosphate
- Turpentine
- Vegetable Oils
- Vinegar
- Water
- Whiskey
- Wine
- Xylene
- Xylol
- Yeast, Aqueous

Note: Volume swell is only one indicator of elastomer fluid compatibility and may be based on the solubility parameter alone. Fluid attack on the backbone of the polymer may show up as a change in physical properties such as Tensile Strength, Elongation at Break, and Hardness. Elevated temperature and extended exposure times may create more aggressive conditions than cited in this guide.
